DESIGNER LINE REFRIGERATOR

Model: DL2R-PT-HD

2-Section Pass-Thru Refrigerator with Half Doors

DL2R-PT-HD - Stainless steel front, aluminum end panels and interior DL2R-SA-PT-HD - Stainless steel exterior, aluminum interior DL2R-SS-PT-HD - Stainless steel exterior and interior

Options and Accessories

(upcharge and lead times may apply)				
Stainless steel case back	Full doors			
Additional epoxy-coated steel shelves	Reach-In			
Chrome or stainless steel shelves	Shallow depth			
Pan slide assemblies	Hinged glass doors			
Rehinging of doors (consult factory)	Increased refrigeration systems			
Expansion valve system	Special electrical req. (consult factory)			
Wine display	Correctional Facility Options			
Casters	One way security screws			
Dial thermometer	• Locking hasp (lock not included)			
Remote models	Stainless steel mesh cover			
Custom laminates	Coverless hinges			

Consult factory for other model configurations, options and accessories.

AIA #:	SIS #:

Standard Model Features

REFRIGERATION SYSTEM

Environmentally-safe R-134a refrigerant

Self contained, performance-rated "plug" refrigeration system

Refrigeration system is readily accessible on top of cabinet, separate from the "food zone" to increase storage capacity

Automatic, hot gas condensate evaporator

CABINET ARCHITECTURE

3" non-CFC polyurethane foam insulation
Chrome-plated flow line handles
Cam action, lift off hinges
Self-closing doors
Magnetic snap-in door gaskets
Cylinder lock in door
Heavy-duty, epoxy-coated steel shelves
Adjustable 6" stainless steel legs

MODEL FEATURES

Automatic interior lighting
External digital thermometer
Energy saving switch for door heaters
Unique air duct system for optimum air flow
Cabinet upper side panels and refrigeration "plug" system

can be easily removed and reinstalled at job site

REFRIGERATION SYSTEM A "performance rated", air-cooled, hermetically sealed, capillary-type refrigeration system is in-stalled on the top of each refrigerator. Plasticized fin coil and air circulation fans are contained within a concealed "plug"-type insulated housing, read-ily accessible on top of the cabinet and separate from the food zone to increase food storage ca-pacity. The entire "plug" system is fully charged with environmentally safe R-134a refrigerant and populated on a church ycter. Fail-two bace which can mounted on a sturdy steel, rail-type base which can be easily removed if freezer conversion is desired. Refrigerators are designed to maintain 38°F-40°F (3°-5° Centigrade) while operating with an upre-(3°-5° Centigrade) while operating with an unre-stricted air supply in a maximum ambient tempera-ture of 100°F. All condensate water is evaporated by an automatic, non-electric, corrosion-resistant condensate evaporator. A strict quality-assurance team inspects all materials and components to certify that each model conforms to the most exacting standards. All models are factory performance-tested for a minimum of 16 hours prior to crating.

INSULATION

All cabinet walls, top and bottom have high density, foamed-in-place, non-CFC polyurethane insulation.

SHELVING

Shelves are designed for heavy-duty use with .306" diameter frame and brace members and .140" di-ameter fill wires spaced 3/4" apart. Shelves are welded steel and epoxy-coated for a durable, long, rust-free service life. Adjustments are in 1 inch increments and a wide door opening allows the use of a variety of optional pan and trav slide types.

CABINET CONSTRUCTION

All materials are of top quality, assembled to con-form with strict quality-assurance requirements. The cabinet front is constructed of heavy-gauge polished stainless steel for durability. All cabinet joints and seams are sealed vapor-tight. Case is of all metal, welded construction and internally supported and braced for a rigid unit construction. Cabinet design eliminated overlapping panels with raw edges. Cabinet body is insulated with non-CFC, foamed-in-place polyurethane foam with an aver-age thickness of 3 inches to ensure increased energy efficiency. Full-length louvered air grille located above the doors allows equal air circulation to the condensing unit. Easily removable, low-wattage, anti-sweat door heaters concealed by a non-metallic, non-conductive, high-impact thermal breaker strip eliminate condensate build-up on the cabinet front. Automatic interior lighting is activated by an easily accessible interior switch. Cabinets are equipped with 6 inch adjustable stainless steel legs.

DOOR CONSTRUCTION Solid hinged door shells are constructed of heavygauge stainless steel and are internally braced and urethane-foam-insulated for rigidity. Door corners are welded construction and polished. Replaceable snap-in door gaskets are self-adjusting, heavy-duty, magnetic type. Door handles and hinges are chrome-plated and non-corrosive. Doors are provided with built-in cylinder locks which are keyed alike. Hinges are cam action, lift-off type featuring positive safety stop at 120 degrees.
